Literature References:

1. A. Weissbach, *Ann. Rev. Biochem.* **46**, 25 (1977)

Comments:

BioChemika, free from low molecular weight nucleotides, lyophilized
broad molecular weight 1×10^6 - 14×10^6

 $M_r \sim 7000000$

Preferred template of DNA polymerase (gamma), useful for the identification of this enzyme

Extended specifications

Concentration

~2.3 $\mu\text{mol/mg}$ poly(A) (in relation to one mononucleotide unit)**Components:****Related Product(s):**
